

Online Resource Database Bundle Workshop

Educational Resource Acquisition Consortium is an association of BC public school districts working together on software, textbook and video evaluation and acquisition. Its goal is to ensure that high quality learning resources are available to schools throughout BC.

ERAC's Online Resource Database Bundle includes an extensive EBSCO collection, World Book's Complete Reference Suite, and Encyclopedia of BC's entire database.

This workshop on the bundle's resources will be led by one of 10 experienced teacher-librarians or teachers trained by ERAC (with assistance from EBSCO and World Book) to deliver the database workshop.

Implementing the Online Resource Database Bundle

Tuesday, September 1st
8:30 to 2:30

Part 1 > Product Introduction and Overview
